Re: 35 Cutter Street, Somerville, MA – structural condition of existing garage

To whom it may concern:

I have inspected the referenced property and certify that, after renovation, the existing garage structure will be structurally sound and will have adequate capacity to satisfy the structural load requirements of the 2009 IBC and 2009 IEBC with 780 CMR Massachusetts State Building Code Amendments. The structural design for the renovation has already been prepared.

If you need any additional information please contact this office at your earliest convenience.

Sincerely,

Kenneth Woods
