Cambridge, MA 02141-1263

**Re: Phase I ESA Review, Database Search, and Summary Review Letter
47 Webster Avenue, Somerville, MA (hereinafter referred to as the Subject Property)**

Dear Mr. Allen,

In accordance with our Letter of Engagement authorized on February 16, 2001, we are pleased to submit our Summary Review Letter for the above-referenced Subject Property. The scope of work for this project involved a site visit, an updated database review, and review of a May 1997 report entitled "Environmental Site Assessment, 47 Webster Avenue, Somerville, MA 02143" provided by East Cambridge Savings Bank. The purpose of the site visit, database review, and Summary Review Letter is to ensure that the recommendations presented in the 1997 report have been addressed, to determine whether the Subject Property, or properties within ASTM-prescribed radii, are listed sites, and to assess the findings of the previous Phase I report.

BACKGROUND SITE AND RELEASE HISTORY INFORMATION

Phoenix Environmental Services, Inc. (Phoenix), of Bedford, Massachusetts, prepared an Environmental Site Assessment Report for the Subject Property in May 1997. Phoenix described the Subject Property as being occupied by a gas-heated, one- and two-story structure containing office space, an auto body shop, and an automotive repair garage operating under the name Sun Auto Repair.

At the time of the Phoenix investigation, the Subject Property was listed as a RCRA Small Quantity Generator (SQG) of hazardous waste.

Based on the findings of their assessment, Phoenix identified no evidence of a release of oil or hazardous materials (OHM) at the Subject Property. This conclusion was based on a site inspection, laboratory analysis of one soil sample collected from the site, a review of federal, state, and local records, and interviews with municipal representatives, facility employees, and the Subject Property owner.

Phoenix indicated that a single floor drain was present in the garage portion of the building which reportedly discharged to the municipal sewer system. Work was reportedly underway at that time to connect an oil/water separator to this drain which would bring the facility into compliance with applicable codes.

Phoenix identified a partially full 55-gallon drum of lubricating oil stored outside of the shed on the south side of the Subject Property. Phoenix recommended that the drum be moved inside to a proper storage location or disposed of.

Phoenix indicated that laboratory analysis of one soil sample collected from the area of the former on-site USTs showed no evidence of subsurface petroleum contamination. This soil sample was collected from an excavation made with a backhoe to a depth of eight feet below ground surface (assumed base of former UST grave). The soil sample was submitted for total petroleum hydrocarbon (TPH) and volatile organic analysis using EPA Method 8010/8020.

No recommendations for further investigations on the Subject Property were made by Phoenix.

DATABASE REVIEW

As part of the Summary Review, EBI contracted Environmental Data Resources, Inc. (EDR) of Southport, Connecticut, to conduct a database search of properties located within ASTM-prescribed radii of the Subject Property. As indicated by the EDR report, the Subject Property is not listed on any of the databases specified.

As indicated by the EDR report, the Subject Property is currently listed as a RCRA Conditionally Exempt SQG (MAD011825213) under the name Sun Auto Repair. The Subject Property was found to be in violation of RCRA requirements (unspecified) on June 23, 1988. The Property achieved compliance with the requirements on December 1, 1990. The Subject Property was not identified on any other state or federal database.

One RCRA Generator was identified adjacent to the Subject Property. This facility is identified as Linnwood Auto Body (RCRA LQG), which abuts the Subject Property on the north side. Two compliance violations were indicated for this site, both of which were listed as "low priority." This site achieved compliance with the RCRA requirements on July 18, 1986 and October 15, 1992, respectively. No indication of a release from this site was indicated in the database report.

As indicated by the EDR report, no NPL, Proposed NPL, CERCLIS (inc. NFRAP sites), Corrective Action sites, or RCRA TSD sites are located within the ASTM-prescribed radii of the Subject Property.

Fifty-seven (57) State Hazardous Waste Sites (SHWS), which are the state's equivalent to CERCLIS, were identified within one mile of the Subject Property. None of these sites were identified within one-eighth mile from the Subject Property. Six (6) of these sites were identified within a one-quarter mile of the Property. Two of these sites are located in the estimated up- or crossgradient direction from the Subject Property. These sites are listed as the former Killey Barrel, at 20-22 Prospect Street, and Somerset Machine & Tool at 37 Allen Street. Both of these sites are located greater than one-eighth mile to the northeast of the Subject Property and, based on their distance and the overall urban nature of the area which includes the Property, are not considered to pose a threat of impact to the Subject Property.

All of the other identified SHWS sites are located in the estimated cross- or downgradient direction or greater than one-quarter mile from the Subject Property. Based on this information, these sites are not expected to impact to the Subject Property.

One (1) State Landfill was identified within one-half mile of the Subject Property. This site, identified as Somerville Incinerator at 10 Poplar Street, is located approximately one-third mile to the east of the Subject Property in the estimated crossgradient direction and is not expected to impact to the Subject Property.

Nine (9) LUST sites were identified within one-half mile of the Subject Property. None of these sites are located within one-eighth mile of the Subject Property. Three (3) LUST sites are located within one-quarter mile of the Subject Property, of which two are located in the estimated upgradient direction. These two sites are identified as a former Citgo Station at 236 Washington Street, and Union Service Station at 231 Washington Street. The Citgo property is listed as a Response Action Outcome (RAO) site, indicating that response actions at the site were sufficient to achieve a level of no significant risk at the. The status of the Union Service Station site is listed as "Not A Disposal Site." Based on the distance and/or location the listed LUST sites relative to the Subject Property, none of these sites are expected to impact to the Subject Property.

No UST sites were listed within one-eighth mile of the Subject Property.

One hundred and twenty (120) Release sites were identified within one mile of the Subject Property. One (1) of these sites, identified as 45 Webster Avenue, is located adjacent to the Subject Property in the estimated upgradient (north) direction. As indicated by the database report, an RAO has been achieved at this site. The nature of the release is not indicated in the report. No other Release sites were identified that are expected to present a threat of impact to the Subject Property based on their remedial status, distance from, and/or location relative to the Subject Property.

SITE INSPECTION

On March 5, 2001, Mr. Stanley Rutkowski of EBI conducted a limited walk-around visual inspection of the Subject Property. The purpose of the limited inspection was to ensure that the recommendations presented in the 1997 Phoenix report had been addressed. Specifically, that the oil/water separator had been connected and that the referenced 55-gallon lubricating oil drum had been removed or properly stored. Mr. Rutkowski was accompanied during the inspection and interviewed Mr. Branko Pishev, the Subject Property owner.

As a result of the limited site inspection, EBI verified that the oil/water separator had been installed and that the aforementioned 55-gallon lubricating oil drum had been removed from the Subject Property. Verification of installation of the oil/water separator was based on information from Mr. Pishev, who stated that the separator was connected in 1998, and on visual observations which indicated that a trench had been excavated from the floor drain in the auto body garage to a separator installed in the parking area outside of the garage. This was in evidence by newer concrete in the garage bay floor and an access to the oil/water separator in the paved area in front of the garage. The actual oil/water separator could not be inspected due to the number of automobiles present in the area in front of the garage. No evidence of staining or spillage was noted in the vicinity of the floor drain. No other floor drains were identified in the Subject Building, and Mr. Pishev stated that this is the only drain which is present on the Property.

Mr. Pishev stated that operations on the Subject Property have not changed since the date of the initial Phase I assessment. Safety Kleen handles and disposes of all waste generated by the facility on an as-needed basis.

CONCLUSIONS

Based on the findings of our limited site inspection, review of the Phoenix Phase I report, and the updated database report, EBI Consultants recommends no further action at this time.

Please call Richard MacAulay or me with any comments or questions you may have. We appreciate the opportunity to be of service.

Sincerely,

Stanley Rutkowski
Senior Scientist

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-00. Search distances are per ASTM standard or custom distances requested by the user.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the target property includes a tolerance of +/- 10 feet. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL ASTM STANDARD

RCRIS: The Resource Conservation and Recovery Act database includes selected information on sites that generate, store, treat, or dispose of hazardous waste as defined by the Act. The source of this database is the U.S. EPA.

A review of the RCRIS-LQG list, as provided by EDR, and dated 06/21/2000 has revealed that there is 1 RCRIS-LQG site within approximately 0.25 miles of the target property.

STATE ASTM STANDARD

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection's List of Confirmed Disposal Sites & Locations to be Investigated.

A review of the SHWS list, as provided by EDR, has revealed that there are 57 SHWS sites within approximately 1 mile of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List

Source: EPA
Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC).

Date of Government Version: 01/23/01
Date Made Active at EDR: 02/16/01
Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 02/05/01
Elapsed ASTM days: 11
Date of Last EDR Contact: 02/05/01

Proposed NPL: Proposed NPL Sites

Source: EPA
Telephone: N/A

Date of Government Version: 01/23/01
Date Made Active at EDR: 02/16/01
Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 02/05/01
Elapsed ASTM days: 11
Date of Last EDR Contact: 02/05/01

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA
Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/16/00
Date Made Active at EDR: 08/16/00
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/05/00
Elapsed ASTM days: 72
Date of Last EDR Contact: 12/29/00

CERCLIS-NFRAP: No Further Remedial Action Planned

Source: EPA
Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

Date of Government Version: 04/16/00
Date Made Active at EDR: 08/16/00
Database Release Frequency: Quarterly

EDR PROPRIETARY DATABASES

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.

HISTORICAL AND OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 1999 from the U.S. Fish and Wildlife Service.

GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

47 WEBSTER AVE
47 WEBSTER AVE
SOMERVILLE, MA 02143

TARGET PROPERTY COORDINATES

Latitude (North):	42.377201 - 42° 22' 37.9"
Longitude (West):	71.096397 - 71° 5' 47.0"
Universal Tranverse Mercator:	Zone 19
UTM X (Meters):	327401.9
UTM Y (Meters):	4693572.5

EDR's GeoCheck Physical Setting Source Addendum has been developed to assist the environmental professional with the collection of physical setting source information in accordance with ASTM 1527-00, Section 7.2.3. Section 7.2.3 requires that a current USGS 7.5 Minute Topographic Map (or equivalent, such as the USGS Digital Elevation Model) be reviewed. It also requires that one or more additional physical setting sources be sought when (1) conditions have been identified in which hazardous substances or petroleum products are likely to migrate to or from the property, and (2) more information than is provided in the current USGS 7.5 Minute Topographic Map (or equivalent) is generally obtained, pursuant to local good commercial or customary practice, to assess the impact of migration of recognized environmental conditions in connection with the property. Such additional physical setting sources generally include information about the topographic, hydrologic, hydrogeologic, and geologic characteristics of a site, and wells in the area.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata. EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

USGS TOPOGRAPHIC MAP ASSOCIATED WITH THIS SITE

Target Property: 2442071-D1 BOSTON NORTH, MA
Source: USGS 7.5 min quad index

GENERAL TOPOGRAPHIC GRADIENT AT TARGET PROPERTY

Target Property: General South

Source: General Topographic Gradient has been determined from the USGS 1 Degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 2.000 Miles.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOLOGIC AGE IDENTIFICATION

Geologic Code: Ce
 Era: Paleozoic
 System: Cambrian
 Series: Cambrian

ROCK STRATIGRAPHIC UNIT

Category: Eugeosynclinal Deposits

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sandy loam
silt loam
very fine sandy loam

Surficial Soil Types: fine sandy loam
silt loam
very fine sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: fine sandy loam
channery - silt loam
gravelly - loamy sand
silt loam
loamy fine sand
stratified

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

gravelly - sandy loam

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

According to ASTM E 1527-00, Section 7.2.2, "one or more additional state or local sources of environmental records may be checked, in the discretion of the environmental professional, to enhance and supplement federal and state sources... Factors to consider in determining which local or additional state records, if any, should be checked include (1) whether they are reasonably ascertainable, (2) whether they are sufficiently useful, accurate, and complete in light of the objective of the records review (see 7.1.1), and (3) whether they are obtained, pursuant to local, good commercial or customary practice." One of the record sources listed in Section 7.2.2 is water well information. Water well information can be used to assist the environmental professional in assessing sources that may impact groundwater flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers

Source: Executive Office of Environmental Affairs

Community Public Water Supplies Datalayer: Data was compiled by the DEP Division of Water Supply and contains 1435 public community water supplies as defined in 310 CMR 22.00. Both groundwater and surface water supplies are included. As stated in 310 CMR 22.00, a Community Water Supply is part of a community water system "which serves at least fifteen (15) service connections used by year-round residents".

Areas of Critical Environmental Concern Datalayer: The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers Datalayer: The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by a EPA hydrogeologist.

Aquifers Datalayer: MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

DEP Approved Zone IIs Datalayer: The Department of Environmental Protection (DEP) approved Zone IIs datalayer was compiled by the DEP Division of Water Supply (DWS). The database contains 281 approved Zone IIs statewide. As stated in 310 CMR 22.02, a Zone II is "that area of an aquifer which contributes water to a well under the most severe pumping and recharge conditions that can be realistically anticipated (180 days of pumping at safe yield, with no recharge from precipitation.) It is bounded by the groundwater divides which result from pumping the well and by the contact of the aquifer with less permeable materials such as till or bedrock. In some cases, streams or lakes may act as recharge boundaries. In all cases, Zone IIs shall extend up gradient to its point of intersection with prevailing hydrogeologic boundaries (a groundwater flow divide, a contact with till or bedrock, or a recharge boundary)." These data are used in association with the Public Water Supplies datalayer. The following describes certain unique features of this association.

- Any proposed new well which will pump at least 100,000 gallons per day must have a Zone II delineation completed and approved by DEP prior to the well coming on line.
- Additionally, a new source may not be on-line yet, but other, older wells may fall within its Zone II boundary.
- Further, existing wells must have a Zone II delineated as a condition of receiving a water withdrawal permit under the Water Management Act.

RADON

Area Radon Information: The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones: Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Epicenters: World earthquake epicenters, Richter 5 or greater

Mr. John P. Allen
Senior Vice President
East Cambridge Savings Bank
292 Cambridge Street
Cambridge, MA 02141-1263

Re: 47 Webster Avenue, Somerville, MA

Dear Mr. Allen:

Thank you for the opportunity to work with East Cambridge Savings Bank on the environmental due diligence in support of your current transaction involving the above referenced subject property.

Based on my understanding of your needs, I propose to prepare a summary document consisting of a summary of the work performed to date and noted areas of environmental exposure, recommendations, and any additional cost estimates.

Particular attention will be devoted to summarizing the obligations of the owners of the current owner and/or East Cambridge Savings Bank within Department of Environmental Protection regulations and the provisions of the Massachusetts Contingency Plan. Also of primary concern will be helping East Cambridge Savings Bank identify its exposure and potential protective measures for the Bank.

We will perform the review for a cost of \$350, in accordance with our Standard Conditions for Engagement, a copy of which is attached.

Thank you again for your consideration Mr. Allen.. Please return confirmation of authorization for my files and a copy of the phase I report at your convenience, and we can get started on the project.

Sincerely,

Mr. Richard T. MacAulay
Managing Consultant

Authorization East Cambridge Savings Bank:

John P. Allen 2/16/01
Signature Date

John P. Allen Sr. Vice President
Name Title

STANDARD TERMS AND CONDITIONS FOR ENGAGEMENT

The Client and EnviroBusiness, Inc. (EBI) hereby agree as follows:

1. **CONTRACT-** The Contract is the Proposal or Contract document that is signed and dated by EBI and the Client including these Standard Terms and Conditions for Engagement which are appended and incorporated by reference.
2. **COMPENSATION FOR SERVICES AND PAYMENT TERMS-** The Client agrees to pay EBI in accordance with the payment terms provided in the Contract.
 Invoices will be submitted upon initiation of work on the project, monthly and/or upon completion of a specified scope of service.
 Invoices are due and payable upon receipt. If payments are not made as agreed, the Client agrees to pay reasonable collection costs and a handling charge of one and one-half percent (1 1/2%) per month.
3. **RIGHT OF ENTRY-** The Client agrees to furnish EBI with the right-of-entry on the land or represents and warrants, if the site is not owned by the Client, that permission has been granted to make site reconnaissance, surveys, borings, and other exploration pursuant to the scope of services in the Contract.
 EBI will take reasonable precautions to minimize damage to the land from use of equipment but has not included in the fee the cost for restoration of damage that may result from EBI's operations, unless specifically stated in the Contract.
4. **UNDERGROUND STRUCTURES-** Unless otherwise agreed, the Client shall provide EBI with locations of buried utilities and other underground structures in areas of subsurface exploration. EBI will take reasonable precautions to avoid damage to the buried utilities and other underground structures noted. If locations are not known or cannot be confirmed by the Client, then there will be a degree of risk to the Client associated with conducting the exploration. In the absence of confirmed underground structure locations, the Client agrees to accept the risk of any damages and losses resulting from the exploration work.
5. **DOCUMENTS-** All reports, design drawings, field data and notes, laboratory test data, calculations, estimates, and other documents that EBI prepares as instruments of service shall remain EBI's property. The Client agrees that EBI's services are on behalf of and for the exclusive use of the Client and that all reports and other documents furnished to the Client or its agents shall be utilized solely for this project. EBI will retain pertinent records relating to the services performed for a period of five (5) years following submission of our report or other documents.
6. **DISPOSAL OF SAMPLE-** Soil, rock, water, and/ or other samples obtained from the project site are the property of the Client. EBI shall discard the samples 60 days after EBI's report has been submitted, unless other arrangements are provided in the Contract. Should any of these samples be found to be contaminated by hazardous substances or suspected hazardous substances, it is the Client's responsibility to arrange and pay for lawful disposal.
7. **RENEGOTIATION OF CONTRACT FOR PRESENCE OF HAZARDOUS MATERIALS-** If the scope of services for this Contract does not include services relating to hazardous waste, oil, asbestos or other hazardous materials, as defined by federal, state and/ or local laws or regulations, and if such materials are discovered during EBI's work, the Client agrees to negotiate appropriate revisions to the scope of services, the budget estimate, and the terms and conditions of the Contracts. When such hazardous materials are suspected, EBI will have the option to stop work until a new agreement is reached. If a mutually satisfactory agreement cannot be reached between both parties, the Contract shall be terminated. The Client agrees to pay EBI for all services rendered, including any costs associated with termination.
8. **CONSTRUCTION SERVICES-** If EBI's construction observations services are included as part of the scope of services in the Contract, EBI will provide personnel to observe construction to ascertain that it is being performed, in general, in accordance with the plans and specifications.
 EBI cannot provide its opinion on the suitability of any part of the work performed unless measurements and observations of that part of the construction are made by EBI personnel.
 EBI's services do not make EBI a guarantor of the contractor's work, and the contractor will continue to be responsible for the accuracy and adequacy of all construction or other activities performed by the contractor. The contractor will be solely responsible for the methods of construction; supervision of personnel and construction; control, of machinery; false work, scaffolding, or other temporary construction aids, safety in, on, or about the job site; and compliance with OSHA regulations.
 In consideration of EBI's performance of its obligations to review and evaluate the various bidders and bid submissions and to make recommendations to the Owner regarding the award of the construction contract, the Owner agrees to hold harmless and indemnify EBI for all costs, expenses, damages, and attorneys' fees which are incurred by EBI as a result of any claims, allegations, administrative or court proceedings, arising out of or relating to any bid protest or such other action taken by any person or entity with respect to the review and evaluation of bidders and bid submissions and/ or recommendations concerning the award of the construction contract. Although this paragraph shall not apply in circumstances in which EBI is finally adjudicated by a court to have actually engaged in intentional and willful conduct without any legitimate justification, privilege or immunity, the Owner shall be obligated to indemnify EBI for all such indemnification obligations incurred by EBI until any such final adjudication has been made by a court of competent jurisdiction.
9. **STANDARD OF CARE-** EBI's services will be performed in accordance with generally accepted practices of the engineers and/or scientists providing similar services at the same time, in the same locale, and under like circumstances. The Client agrees that services provided will be rendered without any other warranty, expressed or implied.
10. **DISPUTE RESOLUTION-** All claims, disputes or controversies arising out of or in relation to the interpretation, application or enforcement of this Contract shall be settled pursuant to the Rules for Commercial Mediation by the American Arbitration Association.
11. **INSURANCE-** EBI is protected by Worker's Compensation Insurance and Employer's Liability Insurance and by Public Liability Insurance. EBI will furnish certification upon written request. The Client agrees that EBI will not be liable or responsible to the Client for any loss, damage, or liability beyond the amounts, limits, exclusions, and conditions of such insurance.
12. **PROFESSIONAL LIABILITY-** The Client agrees to limit liability to an amount of \$50,000 or EBI's fee, whichever is less and to indemnify EBI for any claims or costs from any construction contractor or subcontractor who performs work for which EBI has provided reports, plans, and specifications.

Mr. John Allen
East Cambridge Savings Bank

January 30, 2001
Page 3 of 3

13. **INDEMNIFICATION FOR HAZARDOUS MATERIALS-** The Client agrees that EBI has not contributed to the presence of hazardous wastes, oils, asbestos or other hazardous materials that may exist or be discovered in the future at the site and that EBI does not assume any liability for the known or unknown presence of such materials.
- Therefore, the Client shall defend, indemnify, and hold harmless EBI, its consultants, subcontractors, agents, and employees from and against all claims, damages, losses, and expenses including defense costs and lawyer's fees including those that result from the failure to detect or from the actual, alleged, or threatened discharge, dispersal, release, or escape of any solid, liquid, gaseous or thermal irritant, asbestos in any form, or contaminants including smoke, vapor, soot, fumes, acids, alkalis, chemicals, waste, oil or other hazardous material. The Client shall be liable under this paragraph for claims, damages, losses, and expenses including defense costs and attorney's fees, unless such claims, damages and losses and expenses are caused by EBI's gross negligence.
14. **PUBLIC RESPONSIBILITY-** The Client acknowledges that the Client or the Site Owner, as the case may be, is now and shall remain in control of the Site for all purposes at all times. Except as required by law, EBI does not undertake to report to any federal, state, county, or local public agencies having jurisdiction over the subject matter any conditions existing at the Site from time to time that may present a potential danger to public health, safety, or the environment. The Client agrees to notify each appropriate federal, state, county, and local public agency, as they each may require, of the existence of any condition at the Site that may present a potential danger to public health, safety, or the environment.
- Notwithstanding the provisions of the foregoing, EBI will comply with subpoenas, judicial orders or governments directives, and federal, state, county and local laws, regulations and ordinances, and applicable codes regarding the reporting to the appropriate public agencies of findings with respect to potential dangers to public health, safety, or the environment. EBI shall have no liability or responsibility to the Client or to any other person or entity for reports or disclosures made in accordance with such statutory or other lawful requirements. The Client shall defend, indemnify, and hold EBI harmless from and against any and all claims, demands, liabilities and expense, including reasonable attorneys' fees incurred by EBI and arising directly or indirectly out of EBI's reporting such information under a bona fide belief or upon advice of counsel that such reporting or disclosure is required by law.
15. **SUSPENSION OF WORK-** The Client may, at any time, by a ten (10) day written notice, suspend further work for EBI. The Client shall remain fully liable for and shall promptly pay EBI the full amount for all services rendered by EBI to the date of suspension of services plus suspension charges. Suspension charges shall include the cost of putting documents and analyses in order, personnel and equipment rescheduling or reassignment adjustments, and all other related costs and charges directly attributable to suspension.
- If payment of invoices by the Client is not maintained on a thirty (30) day current basis, EBI may, by providing a ten (10) day written notice to the Client, suspend further work until payments are restored to a current basis. In the event EBI engages counsel to enforce overdue payments, the Client shall reimburse EBI for all reasonable attorney's fees and court costs related to enforcement of overdue payments. The Client shall indemnify and save harmless EBI from any claim or liability resulting from suspension of the work due to non-current payments.
16. **OTHER-** This Agreement shall be deemed executed and delivered within the Commonwealth of Massachusetts, and all rights and obligations of the parties under this Agreement, and any disputes hereunder, shall be governed by the law of the Commonwealth of Massachusetts.

Letter Dated March 11, 1997
- Appendix D - Laboratory Report

1.0 Executive Summary

This report presents a summary of the results of the environmental site investigation of the property located at 47 Webster Avenue, Somerville, Massachusetts 02143 (the Site). It was prepared for the express use of the owner in determining environmental conditions at the Site. The report was prepared in accordance with generally accepted environmental and engineering practices and in conformance with the objectives of MGL, Chapter 21E.

The assessment of the Site is based on visual observations during inspections conducted on March 19 and April 22, 1997, a review of Federal, State and local data bases and interviews with local officials. Conclusions regarding subsurface conditions in the vicinity of former underground storage tanks (USTs) are based on laboratory analysis of soil collected from a depth of eight (8) feet in that area. Work is currently underway to install an oil/water separator in the discharge line of the floor drain leading to the municipal sanitary sewer. This will bring the facility into compliance with Massachusetts Water Resources Authority (MWRA) requirements regarding discharges to the sewer.

Oil or hazardous materials (OHMs) observed at the Site including waste motor oil, lubricating oil, paint and cleaning solvents are noted in this report. The partially full 55-gallon drum of lubricating oil currently stored outside of the shed on the south of the property should either be moved inside to a proper storage location or else disposed of.

No evidence of a release or threat of release at the site was identified.

2.0 Property Description

The Site is located at 47 Webster Avenue (on the corner of Concord Avenue) in the city of Somerville, Middlesex County, Massachusetts. The location is identified on the U.S. Geological Survey, Boston North Quadrangle at Universal Transverse Mercatum (UTM) coordinates 4,963,558mN, 327,405mE and at 42°22'38" N latitude, 71°06'17" W longitude. The Site Locus based on the USGS topographical map is shown in Figure 1. The MA DEP Priority Resources Map labeled Figure 2 identifies potential environmental receptors within a 500-foot and 0.5 mile radius. The 7,264 square foot (0.17 acre) Site is shown as Lot 18 on the Somerville Assessors' Map #82, Block E. A detailed Site Plan is shown in Figure 3.

The MA DEP GIS Priority Resources Map (Fig. 2) identifies no sensitive environmental within 500 feet of the Site, and only various protected open spaces (parks) are shown within a 0.5 mile radius. No other environmental receptors are identified by the Geographic Information System within these radii.

The Site is occupied by a gas heated, 1 & 2-story structure containing office space, an auto body shop and an automotive repair garage. A small shed containing an air compressor is attached to the southwest corner of the building (for building lay-out, see Figure 3). The approximate floor area of the building is 4,600 square feet. The current operator of the Site is Sun Auto Repair. The area around the Site is zoned as residential/commercial. The Site is bordered to the northeast by Webster Ave., to the southeast by Concord Ave., to the northwest by another commercial garage and to the southwest by a vacant lot and residential properties. The topography of the Site is nearly flat.

The water, sewer and gas utilities are provided from Concord Avenue, and electricity is provided via a utility pole located on the sidewalk adjacent to Webster Avenue. A single floor drain was identified in the garage portion of the building. It is believed that the drain discharges to the sewer system on Concord Avenue. Work is currently underway to install an oil/water separator in-line on the discharge, which will bring the system into compliance with applicable codes.

3.0 Property History and Owners

A file search was conducted at various City Offices in Somerville. These offices included Community Development, Fire Prevention, Health Department and Inspectional Services. In addition, the current owner of the property and representatives of the City of Somerville were interviewed. The Fire Dept. records are included as Appendix B.

According to available information, the property has been owned by the Haras family (formerly Haralambos) for more than 20 years and throughout that time has been used for automotive repair. The owner has reported that two (2) USTs were removed from the Site during the 1970s but no record of the tank removal was found during the file reviews. The former tank locations are shown on Figure 3.

No other record of former owners of the property was found. However, an employee of the Inspectional Services Department believed that the property had previously been used as a bakery.

4.0 Regulatory File Review

A search of the following Federal and State databases was conducted:

- * National Priority List (Superfund)
- * CERCLIS (potential Superfund) List
- * RCRA TSD Facilities
- * RCRA Generators
- * RCRA Historical
- * EPA Emergency Response Notification System (ERNS)
- * MA DEP Disposal Sites
- * MA DEP Spills
- * SW Landfills
- * Registered USTs

A number of sites were identified in those databases within a radius of 1 mile or less. The sites are all listed in the Environmental FirstSearch Report contained in Appendix A. Those with coordinates available are plotted on plans at the end of that appendix. The subject Site is included in the RCRA Generators list.

Listed sites identified within a 0.25 mile radius are as follows:

RCRA Generators

Five (5) RCRA Generators were identified including the subject Site. Charlies Foreign Motors (Map ID #5), Linwood Auto Body (#8) and West Suburban Leasing Co. (#9) are located crossgradient, to the south of the Site. Goodyear Tire & Rubber Co. (#6) is located 2/10ths of a mile to the north. These locations are not expected to present a risk to the Site in the event of a release.

EPA Emergency Response Notification System (ERNS) Sites

Four (4) ERNS sites were identified within 1/4 mile. Two of these incidents involved the improper handling of asbestos shingles in October of 1995 (Map ID #15 & 16). Another reported incident involved a carbon monoxide release in January 1993 (#17). The other listed ERNS site was reported as the possible burial of oil drums by the owner at 84-86 Webster Avenue (#18) which is downgradient to the Site. None of these releases could reasonably be expected to impact the subject Site.

State Sites List

Twelve (12) State Sites were identified. All are located to the east of Prospect Street which is considered downgradient to the subject Site.

State Spills

Ten (10) State Spills were reported within a 1/4 mile radius. All of these spills occurred to the east of Prospect Street which is downgradient both by surface elevation and presumed groundwater flow.

Registered USTs

Boston & Maine R.R. Yard Facility (Map ID #159), Goodyear Associates (#6) and Union Gulf (#129) all maintain registered underground storage tanks (USTs). It is not reasonable to assume that the tanks would pose a threat of release to the soil or groundwater at the Site.

It does not appear that any of the listed sites or spills have a potential exposure pathway to the subject site.

A review of Somerville Health and Fire Department files indicated no record of any historic release or threat of release of OHMs at the Site. However, Fire Department records indicate that a 1,000-gallon gasoline UST was installed at the adjacent potentially upgradient property (45 Webster Ave.) on June 26, 1924. The current status of this tank is unknown, however it is not included on the State Registered USTs List.

Massachusetts Water Resources Authority (MWRA)

A copy of a Massachusetts Water Resource Authority (MWRA) Letter dated March 11, 1997 was obtained from the Somerville Inspectional Services office (App. C). This Letter mandates that the facility comply with applicable regulations regarding floor drain discharges to the sanitary sewer. As a result, an oil/water separator is being installed in the discharge line in order to bring the facility into compliance with those requirements.

5.0 Site Inspection

An initial Site inspection was conducted on March 19, 1997. This included a site walk-over and a limited inspection of the building interior due to the unscheduled nature of the visit. In addition, facility employees were interviewed regarding the commercial activities and OHMs used at the Site.

OHMs identified on-site include lubricating oil, waste motor oil, paint and cleaning solvents.

A partially full 55-gallon closed-head (17E) drum of lubricating oil was noted during the Site walk-over. It is located on the concrete pad outside the shed on the southern portion of the property. Labels indicated that the drum contains "Citgo Dexron IIE Mercon". A visual inspection of the drum showed no evidence of leaks or physical damage although the exterior is quite rusted. It is recommended that this drum be stored inside if the contents are being used or else removed if it is no longer being used.

An employee of Sun Auto Repair indicated that the facility is currently used for auto-body repair in the south bay and engine repair work in the northeast bay. OHMs being used for these activities are paint, various lubricating oils and cleaning solvents. It was indicated that waste motor oil is stored in drums pending off-site disposal, however, these drums were not inspected.

A soil sample was collected from the area of the former USTs on April 22, 1997. The sample was obtained using a backhoe to excavate to a depth of eight (8) feet. The former floor of the UST excavation was encountered at that depth, based on a change in strata from stone fill to native clay. Laboratory analysis of the sample indicated no evidence of petroleum contamination in the soil. Total Petroleum Hydrocarbon (TPH) and Volatile Organic Compound (VOC) results were below the method quantitation limits (EPA Method 8100 and 8020, respectively). The lab report is included as Appendix D.

6.0 Summary and Conclusions

There is no evidence of a release or threat of release of oil or hazardous materials (OHMs) at the subject Site located at 47 Webster Avenue, Somerville, MA. This is based on a site inspection, laboratory analysis of on-site soils, a review of Federal, State and local records and interviews with municipal representatives, facility employees and the property owner.

Laboratory analysis of the soil sample collected from the area of the former USTs show no evidence of subsurface petroleum contamination.

Current activities to install an oil/water separator will bring the facility into compliance with MWRA requirements for maintaining the connection of the floor drain to the sewer.

Removal of the 55-gallon drum outside the south side of the building to either inside storage or disposal is recommended in order to minimize the risk of any future release.

7.0 Limitations

- A. This report has been prepared for the specific purpose stated herein. The scope of services associated with this report was developed in light of those specific requirements. Third parties are entitled to rely upon the results of this report only to the same extent as the Client.
- B. Conclusions contained in this report are based on information derived from a review of records, interviews with individuals noted, site inspections and quantitative and qualitative chemical analyses of soil.
- C. No representations concerning radon, lead paint, asbestos or urea-formaldehyde insulation are made.
- D. This report was prepared in accordance with generally accepted engineering and environmental practices and in conformance with the objectives of M.G.L., Chapter 21E.
- E. No other warranty, express or implied, is made.

March 11, 1997

NRS SCORING MAP DATA SOURCES

AQUIFERS: USGS-WRD/MassGIS, 1:48,000. Automated by MassGIS from the USGS Water Resources Div. Hydrologic Atlas series manuscripts. The definitions of high and medium yield vary among basins. (1977 to 1988.)

SOLE SOURCE AQUIFERS: US EPA/MA DEP/MassGIS, various scales. They are defined by EPA as aquifers that are the 'sole or principal source' of drinking water for a given aquifer service area. Last updated July 1993.

DEP APPROVED ZONE IIS: MA DEP, 1:25,000. As stated in 310 CMR 22.02 'that area of an aquifer which contributes water to a well under the most severe pumping and recharge conditions that can be realistically anticipated.' Digitized from the DEP Water Supply Protection Atlas by DEP-DWS (Division of Water Supply) staff. (1983 to January 1995.)

POTENTIALLY PRODUCTIVE AQUIFERS: DEP-BWSC Bureau of Waste Site Cleanup. These aquifers are defined as all medium or high yield aquifers except for that portion of the aquifers surface area that falls within a city or town that has a population density of greater than 400 people per square mile, based on the most recent U.S. Census.

INTERIM WELLHEAD PROTECTION AREAS: DEP-DWS (Division of Water Supply), 1:25,000. Half-mile buffers zones were generated using the Community Public Water Supplies point coverage (see below). These polygons represent an interim Zone II for a groundwater source until an actual one is approved by the DEP Division of Water Supply. (January 1995.)

HYDROGRAPHY: USGS/MassGIS. Nearly half of the state is available as 1:24000/1:25000 USGS Digital Line Graph (DLG) data. In addition, for 40% of the state, USGS 1:100000 DLG hydrography has been enhanced with 1:25000 hydrographic features. The remaining were digitized at 1:25000 by MassGIS. Source dates vary for DLGs and USGS quadrangles.

WETLANDS: UMass Amherst RMP/MassGIS, 1:25,000. Includes nonforested wetlands extracted from the 1971-1984 Land Use atlas which was photointerpreted from Summer CIR photography. Interpretation was not done in stereo. Also includes, in some areas, forested wetlands from USGS Digital Line Graph (DLG) data.

PROTECTED & RECREATIONAL OPEN SPACE: EOEA (Executive Office of Environmental Affairs) MassGIS, 1:25,000. Includes federal, state, county, municipal, non profit, private conservation and recreation lands and facilities. Geographic data sources are dominantly town tax assessor maps and existing open space plans. Most of these maps have been recompiled onto a 1:25000 base map provided by MASSGIS. The data are then digitized from these base maps, which contain registration points. Ongoing updates.

ACECs: CZM and DEM, 1:25,000. Areas of Critical Environmental Concern are areas designated by the Secretary of EOEA as containing a number of valuable environmental features coexisting. Projects in ACECs are subject to the highest standards of review and

ROADS: USGS/MassGIS, 1:100,000. MassGIS extracted roads from the USGS Transportation DLG files. They generalized, modified, and updated this coverage. Major roads are part of the state, US, or interstate highway systems. Circa 1985.

DRAINAGE BASINS: USGS-WRD/MassGIS, 1:24,000. Automated by MassGIS from USGS Water Resources Division manuscripts with approximately 2400 sub-basins as interpreted from 1:24,000 USGS quadrangle contour lines. Individual basins for surface Community Public Water Supplies were added by DEP in April 1993. 1987 - 1993.

POLITICAL BOUNDARIES: MassGIS/USGS, 1:25,000. This datalayer was digitized by MassGIS from mylar USGS quads. Source date is approximately 1985.

QUADRANGLE INDEX: MassGIS. Generated from USGS 7.5 minute quadrangle corner coordinates converted from lat/long to Mass. State Plane coordinates. 1985.

DEP PERMITTED SOLID WASTE FACILITIES: DEP-DWS (Division of Solid Waste), 1:25,000. Includes only facilities regulated since 1971. Most are sanitary landfills, though transfer stations and recycling or composting facilities are included. Either facility boundaries were compiled or approximate facility point locations drafted onto USGS quadrangles and automated by the DEP Division of Solid Waste. Last updated 1994.

PUBLIC WATER SUPPLIES: DEP-DWS, 1:25,000. Community and non-community surface and groundwater withdrawal points were field collected using Global Positioning System receivers. The attributes were added from the DEP Division of Water Supply database. Last updated January 1995.

SITE LOCATION: Location coordinates were converted to state plane coordinates from user supplied longitude and latitude or UTM. Coordinates are site specific and source dates vary.

NHESP Estimated Habitats of Rare Wetlands Wildlife: Polygons show estimated habitats for all processed occurrences of rare wetlands wildlife. Data collected by Natural Heritage & Endangered Species Program and compiled at 1:24000 or 1:25000 scale. For use with Wetlands Protection Act Only. Effective Jan. 1, 1995 through Dec. 31 1995.

NHESP Certified Vernal Pools: Points show all vernal pools certified by NHESP/MADFW (Fisheries and Wildlife) as of January 1, 1993. Data compiled at 1:24000 or 1:25000 scale. Effective January 1, 1995 through December 31, 1995

Notice of Disclaimer / Waiver of Liability

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to New England DataMap Technology, certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in New England DataMap Technology's databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for maintaining the detailed files for each specific site. Although New England DataMap Technology uses its best efforts to research the actual location of each site, New England DataMap Technology does not and can not warrant the accuracy of these sites with regard to exact location or size. All authorized users of New England DataMap Technology's services generating this report did so with an understanding of New England DataMap Technology's search and mapping conventions, and agreed to waive any and all liability claims associated with search and map results showing incomplete or inaccurate site locations.

UNDERGROUND TANK SURVEY

March 25, 1997

TO: Donald L. Corey
Phoenix Environmental Services Inc.
P.O. Box 276
Bedford, Ma. 01730

RE: 47 Webster Ave

The below information reflects the records of the Somerville Fire Department relative to underground tanks installed or removed within the City of Somerville which we hope will assist you in your 21E survey.

You are advised that the Somerville Fire Department is providing this information "to the best of our knowledge" and bears no burden for: "infallible records" for which you are passing on this information to your client.

See attached printouts for property located at: 47 Webster Ave

Abutters & locations nearest 47 Webster Ave: See attached printouts.

Records of spills or leaks of flammable or hazardous materials:
See attached computer printouts.

Respectfully,

James A. Wright

Sun Auto Repair
47 Webster Ave.
Somerville, Ma 02143

Subject: Floor Drains

Dear Sir:

On March 7, 1997, Richard Delahanty of my staff conducted an inspection of your facility located at 47 Webster Avenue, Somerville. The inspection revealed that your facility has one or more floor drains but the inspector was unable to find a gasoline/oil separator. In a facility such as yours, with the potential to discharge oil, gasoline, or other petroleum based products to the sanitary sewer system via floor drains, a gasoline/oil separator is required by the Commonwealth of Massachusetts Uniform State Plumbing Code [248 C.M.R. § 2.09:1(a)] and by the Massachusetts Water Resources Authority Sewer Use Regulations 360 C.M.R. § 10.016(1). You should be aware that under 360 C.M.R. § 10.016, both the owner and the operator of a facility are jointly and severally responsible for compliance.

Therefore, this office is requiring that your company comply with the requirements listed below, and notify this office upon completion:

1. Locate, no later than April 11, 1997, any existing gasoline/oil separator; or
2. Show evidence, no later than April 11, 1997, that the floor drains are not connected to the sanitary sewer. Acceptable evidence may include: a) as built plans, certified by a Professional Engineer, showing the discharge of the floor drains; b) official documents from City showing the discharge of the floor drains; or c) a report, prepared by an independent engineering firm or plumbing contractor, describing the procedures and results of a dye test of the floor drains. Please be aware that if the floor drains are not connected to the sanitary sewer, the MWRA will refer your facility to the Department of Environmental Protection for possible follow-up investigation; or
3. If no separator is located, and your floor drains are connected to the sewer, install, no later than June 11, 1997, a gasoline/oil separator to service all existing floor drains in areas where petroleum-based products are used or stored.

REPORT

Work Order # 97-04-416

Results by Sample

SAMPLE ID PIT FLOOR (8') FRACTION 01A TEST CODE 8020 NAME PURGEABLE AROMATICS
 Date & Time Collected 04/22/97 11:40:00 Category SOIL

EPA 8020

	RESULT	LIMIT
BENZENE	<u>ND</u>	<u>2.0</u>
TOLUENE	<u>ND</u>	<u>2.0</u>
ETHYLBENZENE	<u>ND</u>	<u>2.0</u>
XYLENES (TOTAL)	<u>ND</u>	<u>2.0</u>

Notes and Definitions for this Report:

DATE RUN: 04/29/97

ANALYST: PL

INSTRUMENT: V5

DIL. FACTOR: 1

UNITS: ug/Kg

ND = not detected at detection limit

Received: 04/23/97

Results by Sample

SAMPLE ID PIT FLOOR (8') FRACTION 01A TEST CODE DRO NAME PETROLEUM SCAN BY GC
 Date & Time Collected 04/22/97 11:40:00 Category SOIL

DIESEL RANGE ORGANICS

PARAMETER	RESULT
Total Petro. Hydrocarbons	<u>ND</u>

DETECTION LIMIT

Water Matrix	<u>*</u>
Solid Matrix	<u>10.0 mg/Kg</u>

Notes and Definitions for this Report:

EXTRACTED 04/25/97

DATE RUN 04/30/97

ANALYST ST

INSTRUMENT HP 5

ND = Compound(s) not detected
above detection limit

Test Methodology

TEST CODE 8020 NAME PURGEABLE AROMATICS

EPA Method: 8020. Volatile Aromatic Compounds.

Reference: Test Methods for Evaluating Solid Waste: Physical/Chemical
Methods. EPA SW-846 (Third Edition) 1986.
Office of Solid Waste, USEPA.

TEST CODE DRO NAME PETROLEUM SCAN BY GC

EPA Method: 8015 Modified/3550; Diesel Range Organics

Reference: Test Methods for Evaluating Solid Waste: Physical/Chemical
Methods. EPA SW-846 (Third Edition), Final Update I.

Quantitation is performed for compounds eluting between 1,2,4-
trimethylbenzene (C9) and hexatriacontane (C36) using the response
factor of o-terphenyl.

TEST CODE EDROS NAME EXTRACTION DRO SOIL

Method not available.
